SRI RAMAKRISHNA ENGINEERING COLLEGE, COIMBATORE

(Autonomous Institution, Reaccredited by NAAC with 'A+' Grade Approved by AICTE and Permanently affiliated to Anna University, Chennai)

AUTONOMOUS EXAMINATIONS - NOV'2024

COMMON TO B.E – CSE & M.TECH - IT

20CS210 - PROGRAMMING PARADIGMS - III

Answer ALL questions

Duration: 3 Hours

Maximum: 100 Marks

PART - A

(7x 1 = 7 Marks)

1. **CO1** Which type of Programming does Python support?
a) object-oriented programming b) structured programming
c) functional programming d) All of the above
2. **CO2** Which of the following is not a core data type in Python programming?
a) Tuples b) Lists c) Class d) Dictionary
3. **CO2** What provides two-way communication between two different programs in a network?
a) socket b) port c) http d) protocol
4. **CO3** What does the following block of code do?

```
mysock = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
mysock.connect(('data.pr4e.org', 80))
cmd = 'GET http://data.pr4e.org/romeo.txt HTTP/1.0\r\n\r\n'.encode()
mysock.send(cmd)
```

a) It sends a request to extract 'romeo.txt' from 'data.pr4e.org'
b) It sends the 'romeo.txt' file to 'data.pr4e.org'
c) It creates a file named 'romeo.txt'
d) It throws an error because a socket cannot use HTTP
5. **CO4** What protocol can be used to retrieve web pages using python?
a) urllib b) bs4 c) HTTP d) GET

6. **CO5** Python DB-API is: _____.
a) A python module b) Specification for database connectivity module
c) Used to access SQLite database d) None of the above
7. **CO5** By default, Django configuration uses which database?
a) MySQL b) SQLite c) Oracle d) None of the above

Fill in the blanks:

(3x 1 = 3 Marks)

8. **CO2** _____ Django functions are used to take http requests and return http responses.
9. **CO3** cloud computing means _____.
10. **CO5** Microblogging means _____.

PART - B

(5x 3 = 15 Marks)

11. **CO1** Write a Python program to read first n lines of a file.
12. **CO2** Discuss briefly about the Tkinter framework, focusing on its strengths.
13. **CO3** What is a web client and web server in Python?
14. **CO4** List the three primary ways to run python shell commands. Give sample programs for each.
15. **CO5** What is App Engine SDK? What are the two ways by which you can run your applications in App Engine?

PART - C

(5 x 15 = 75 Marks)

Q.No: 16 Compulsory Question

Q.No: 17 to 22 Answer any FOUR Questions

Compulsory Question:

16. **CO1** i) Develop a python program to do the following operations. Calculate the number of occurrences of a given character in a user input string, and replace all of them with '\$'. (8)
CO2 ii) Split the string whenever there is an occurrence of '\$' and store it in a list "MyList". Convert the list "MyList" into a tuple and print it. (7)
17. **CO3** i) What are the steps involved in the execution of a client-server program using python? And Briefly discuss about various server socket methods available in python. (8)

- CO2** ii) Write the python client and server scripts where client sends a multiline message to server and the server displays the message. (7)
18. **CO4** i) Explain in detail any two examples of python based web (HTTP) servers. (8)
- CO3** ii) In the context of CGI, explain the various actions associated with navigating through webpages using hyperlink. Use suitable architectural diagrams to support your answer. (7)
19. **CO4** i) How is CRUD related to Django Admin Application? (8)
- CO3** ii) Discuss in detail about Django Admin Application, focusing on creating users, including models, updating members, and other services. (7)
20. **CO3** i) Discuss briefly about Microblogging using twitter (8)
- CO5** ii) Discuss briefly about Yahoo Finance Stock Quote Server (7)
21. **CO3** Discuss in detail using suitable examples, Django – the web framework, its features, creation and access of projects, addition of database to an application model. (15)
22. **CO3** Using suitable programming example(s), explain how python supports object oriented programming concepts. (15)
