SRI RAMAKRISHNA ENGINEERING COLLEGE, COIMBATORE

(Autonomous Institution, Reaccredited by NAAC with 'A+' Grade Approved by AICTE and Permanently affiliated to Anna University, Chennai)

AUTONOMOUS EXAMINATIONS - MAY'2025

COMMON TO B.E – CSE & M.TECH - CSE

20CS210 - PROGRAMMING PARADIGMS-III

Answer ALL questions

Duration: 3 Hours

Maximum: 100 Marks

PART - A

(7x 1 = 7 Marks)

1. **CO1 Name the keyword used to check the two objects are of same type.**
a) is equal b) equal c) equal to d) is
2. **CO1 What is the output of the following code? a="Welcometopython" print(a[:4])**
a) Wooh b) welcome to python c) welpyth d) topython
3. **CO1 What will be the output of the following code snippet? example = ["week1", "week2", "week3", "week4"]; del example[2] print(example)**
a) week1, week3, week4 b) week1, week2, week4
c) week3, week4 d) week1, week2
4. **CO2 Name the GUI frameworks in Python that is best suited for creating cross-platform applications with a modern look and feel _____.**
a) Tkinter b) PyQt c) Kivy d) wxPython
5. **CO2 Name the Django tool used for creating backend interfaces for managing data.**
a) Admin App b) Shell c) View Engine d) ORM
6. **CO3 Choose the purpose of 'Model.py' in Django.**
a) Defines UI layout b) Manages URLs
c) Maps data to database tables d) Sends emails

7. CO3 Complete the following Python code to read an entire file as a string:

with open ("sample.txt", r) as file:

content = file. _____() print(content)

a) connect

b) write

c) read

d) r()

Fill in the blanks:

(3x 1 = 3 Marks)

8. CO3 A TCP server uses _____ to receive incoming client connections.

9. CO3 _____ function is used to establish a remote connection socket in python.

10. CO4 _____ service in Google App Engine can be used to minimize database queries.

PART - B

(5x 3 = 15 Marks)

11. CO1 Outline the lambda function will perform in python program.

12. CO2 Build a simpleTkinter window with label "Welcome to Python" displayed in center alignment.

13. CO3 Interpret the Built-in Server and Client socket methods.

15. CO4 List out the benefits of ORM web based applications.

PART - C

(5 x 15 = 75 Marks)

Q.No: 16 Compulsory Question

Q.No: 17 to 22 Answer any **FOUR** Questions

Compulsory Question:

16. CO4 i) Explain the Connection objects & Cursor Objects with description. (8)

CO4 ii) Develop a mysqldb database program for creating connection, inserting, updating & deleting the elements in python. (7)

17. CO2 i) Explain the exception handling and how to handle runtime error with example program. (8)

CO2 ii) Describe the file handling read and write access rights in python with suitable program. (7)

18. **CO2** i) Develop a GUI application for Food ordering system using Tkinter (8)
- CO2** ii) Build a simple Payroll System web interface using Python CGI scripting (7)
with the help of an HTML form for users to Salary Calculation and
Manages employee information, including personal details, salary
structures, and tax information. Make use of a CGI script to retrieve and
display this data in a formatted HTML page
19. **CO3** i) Assume the TCP server is waiting and ready to accept any connection and (8)
the TCP client sends the message to the server. Develop a client and
server application using socket
- CO3** ii) Explain the different types of sockets and socket components with (7)
example.
20. **CO1** i) Develop a python program to validate the password and display whether (8)
the password is valid or not. The requirements for a valid password are
- It should have both upper case and lower case characters.
 - It should have one special symbol [!@#&].
 - It should have at least one number.
 - Minimum length for password should be 6 and maximum length should be 10
- CO1** ii) Compare shallow copy and deep copy with example program (7)
21. **CO3** i) Illustrate the process of creating an admin blog application using Django. (8)
- CO3** ii) Illustrate the steps to creating a model to database services in Django. (7)
22. **CO4** i) Describe the steps to configure the Google App Engine SDK in Python. (8)
- CO4** ii) Illustrate the process of extracting data from Twitter. (7)
